🐙 github.com/surajkc494

Second-year Computer Science undergraduate at GRIET (CGPA: 9.18) with hands-on experience in machine learning, full-stack development, and self-supervised AI models. Actively seeking opportunities to contribute to impactful ML and software engineering projects. Passionate about solving real-world problems through data-driven solutions and building in collaborative environments.

EDUCATION

B.Tech – Computer Science & Engineering

Gokaraju Rangaraju Institute of Engineering & Technology (GRIET), Hyderabad

CGPA 9.18 / 10

2024 – 2028 (Expected)

Intermediate (12th Standard)

Sri Chaitanya Junior College · Telangana State Board (TSBIE)

989 / 1000 · 98.9%

2022

Secondary School (10th Standard)

SVR High School · SSC Board

9.5 / 10 · 95%

2020

TECHNICAL SKILLS

Languages

Python Java C

Web Dev

React Node.js HTML CSS Flask

ML / AI

PROJECTS & HACKATHONS

Spasht Bot – AyushmanBharat Fraud Detection System

🏆 HackWithAI

Built a fraud detection web application using the Isolation Forest algorithm to identify anomalous healthcare claims by analyzing patient and doctor data from CSV inputs. Delivered a full-stack interface with real-time fraud flagging and interactive visualization dashboards.

Role: ML Model Training & Prediction — designed and trained the anomaly detection pipeline, implemented predict endpoints, and integrated results with the React frontend.

OCR Self-Supervised Text Recognition Model

Academic Project

Developed a self-supervised Optical Character Recognition (OCR) model capable of extracting text from images without labeled training data. Implemented preprocessing pipelines for image normalization and noise reduction; trained using contrastive self-supervised learning and evaluated across varied fonts and backgrounds.
