Third-year (penultimate-year) Computer Science undergraduate at GRIET (**CGPA: 9.1/10**) with hands-on experience in machine learning, full-stack development, and self-supervised AI models. Seeking impactful ML and software engineering internships, with a track record of delivering measurable performance gains through data-driven solutions.

EDUCATION

B.Tech — Computer Science & Engineering

Gokaraju Rangaraju Institute of Engineering & Technology (GRIET), Hyderabad

CGPA: 9.1/10
2024 – 2028 (Expected)

Intermediate (12th Standard)

Sri Chaitanya Junior College · Telangana State Board (TSBIE)

989/1000 (98.9%)
2022

Secondary School (10th Standard)

SVR High School · SSC Board

GPA: 9.5/10 (95%)
2020

TECHNICAL SKILLS

Languages : Python, Java, C

Web Dev : React, Node.js, HTML, CSS, Flask, JavaScript

ML / AI : PyTorch, OpenCV, Isolation Forest, LLM Integration, Prompt Engineering

Databases : MongoDB, MySQL

Tools : REST APIs, Git, GitHub, Vercel, GitHub Pages

DSA Practice : LeetCode, Codeforces, InterviewBit

PROJECTS & HACKATHONS

JAY-Bot Pro — Professional AI Assistant

GitHub | Live Demo (jay-bot-pro.vercel.app)

- Designed and developed an advanced, responsive AI-powered conversational bot offering fast, context-aware answers.
- Implemented smooth streaming responses, chat history management, and clean UI/UX components leveraging web technologies.
- Deployed the production-ready application seamlessly on Vercel to guarantee high uptime and optimized delivery.

React · Node.js · LLM API · Vercel · CSS · JavaScript

Spasht Bot — Ayushman Bharat Fraud Detection System

HackWithAI

- Built a fraud detection web application using the Isolation Forest algorithm to identify anomalous healthcare claims by analyzing patient and doctor data from CSV inputs.

- Delivered a responsive full-stack interface with real-time fraud flagging, reducing anomalous claim detection latency by 40% via optimized dashboard visualizations.
- Role: ML Model Training & Prediction — designed and trained the anomaly detection pipeline, implemented prediction API endpoints, and integrated results with the React frontend.

Python · Scikit-learn · Flask · React · Isolation Forest · Anomaly Detection

OCR Self-Supervised Text Recognition Model

Academic Project

- Developed a self-supervised Optical Character Recognition (OCR) model capable of extracting text from images without labeled training data.
- Implemented preprocessing pipelines for image normalization and noise reduction; trained using contrastive self-supervised learning.
- Evaluated across 15+ varied fonts and complex backgrounds, achieving a 92% character recognition accuracy rate.

Python · PyTorch · OpenCV · Self-supervised Learning · Contrastive Loss

Personal Developer Portfolio Website

GitHub | Live Demo (surajkc494.github.io/my-portfolio)

- Designed a responsive and modern personal portfolio site to dynamically showcase software projects, academic details, and live applications.
- Optimized structural performance, visual assets, and navigation, maintaining an intuitive user flow and showcasing modern design trends.
- Configured and automated builds for static deployment on GitHub Pages to guarantee immediate accessibility.

HTML5 · CSS3 · JavaScript · GitHub Pages · Responsive Design

CERTIFICATIONS & ACHIEVEMENTS

- Java Full Stack Internship (8-week) — EduSkills Academy (Jun 2026)
- Gemini for Google Workspace — Google (2025)
- Java – Master in Fundamentals — Scaler
- Ethical Hacker Essentials / Cybersecurity Basics — Cisco Networking Academy
- HTML Essentials — Cisco Networking Academy (Aug 2025)
- ACM Winter Coding Contest 5.0 — ACM Student Chapter, VNRVJIET (2025)

SOFT SKILLS

Leadership & Communication · Team Collaboration · Time Management · Quick Adaptability · Problem Solving · Multilingual (English, Telugu, Tamil, Hindi)
